Guide to Eating Fish Safely for Alaska Women and Children

Mix and match your fish meals* for up to:

12 POINTS PER WEEK

* A meal size is 6 ounces (uncooked weight) for adults and 3 ounces for children age 12 years and under.

Alaska fish is good for you. State health officials recommend that everyone eat fish at least twice a week. All fish contain some level of mercury, a toxic metal that can harm the developing nervous systems of unborn babies and young children.

Women who are or can become pregnant, nursing mothers and children 12 and under should follow these guidelines to limit their mercury intake. Everyone else can eat as much seafood as they like.

Unlimited amounts

- All species of AK salmon
- AK halibut under 20 pounds
- AK lingcod under 30 inches
  - AK Pacific cod
  - AK black rockfish
  - AK walleye pollock
- Canned chunk light tuna
- AK Pacific ocean perch

Eat a variety of fish and other seafood as part of a balanced diet.
